EDUCATION

- **University of Engineering and Technology**

Lima, PE

BS in Computer Science; GPA: 3.8

Aug. 2020 – 2024

- **Relevant Coursework::** Data Structures and Algorithms, Platform Development (Mobile and Web App), Computer Networking, Machine Learning, Cybersecurity

EXPERIENCE

- **Horizon AI, Inc.**

San Francisco, CA

Co-founder & Chief Product Officer

January - October 2023

- **Startup Success:** Co-founded Horizon AI, revolutionizing asset management with an AI co-pilot. Horizon delivers personalized, rapid reports for asset managers, reducing production time from weeks to minutes. Our services include market updates, public information books, financial reports, and more. Secured \$100,000 USD in funding from Platanus Ventures. Our founding team comprises seasoned professionals from JP Morgan, Twitter, Wolfram, and experienced startup founders.
- **Technical Expertise:** - Developed a robust RAG (Retrieve, Analyze, Generate) system for extracting data from various sources, including PDFs and web links. - Designed and built a user-friendly frontend platform using NextJS and TailwindCSS.

- **Syntax**

Lima, Peru

Chief Executive Officer (CEO)

January - November 2023

- **Startup Success:** Co-founded Syntax, an innovative AI-driven English tutoring platform specializing in personalized learning experiences through audio calls. Secured substantial funding from renowned investors, including Platanus Ventures and UTEC Ventures, raising a total of \$125,000 USD.
- **Technical Achievements:** - Led the development of "Emma," our AI conversational English tutor with a human-like memory. Implemented a memory system to retrieve users' key interests based on their conversation history, creating a more personalized learning experience. - Significantly improved the voice-to-speech system, achieving latency of less than 1 second, enhancing the user experience and responsiveness of our platform.

- **Luteach**

Lima, Peru

Software Engineer

October - December 2022

- **Enhanced E-Learning Platform:** Implemented performance optimizations for the e-learning platform, significantly improving its overall performance. Upgraded and streamlined the authentication system using Auth0 to enhance security and user experience.
- **Frontend Development:** Contributed to frontend development using NextJS and Tailwind, creating a user-friendly and visually appealing interface for the e-learning platform, ensuring an engaging user experience.

- **University of Engineering and Technology**

Lima, Peru

Teacher Assistant

August 2022 - December 2022

- **Software Engineering I (2022-2):** Participated in the development of the course website, which included updates, solved exams, assignments, and quizzes. Conducted recitation sessions for the final project course, covering topics such as design patterns, architecture, large-scale web applications, and production deployment.
- **Platform Development (2022-1):** Assisted in solving exams, assignments, and quizzes. Conducted recitation sessions and provided explanations on implementing APIs (Restful) for large-scale projects (apps) and introduced concepts of functional programming with Java.

RESEARCH

- **Blood Cells Detection System for rural zones at Peru**

2020

Alexander Morales, Christian Wiki, Cesar Alhua

Persona research paper

AWARDS, HONORS, AND ACHIEVEMENTS

- **Platanus Ventures (200K USD - Venture funding):** Recognized by Platanus Ventures, the leading startup accelerator in Latin America with an acceptance rate of only 0.8% per batch. **Two startups founded were accepted at the age of 20.**
- **UTEC Ventures (25K USD - Venture Funding):** Granted funding from UTEC Ventures, a startup micro-VC supporting extraordinary projects in Peru. The fund boasts a 70M USD portfolio, including notable startups such as CoderHouse, Talently, and Fitia (YC 2021). **Recognized as the first AI startup in the portfolio**
- **Undergraduate Scholarship - Full degree:** Awarded a full undergraduate scholarship by the University of Engineering and Technology (UTEC) for exceptional projects and achievements, covering the entire program.
- **Divulgation:** Youtube video with more than 25k views: *"How to create an AI as a teenager"*

PROGRAMMING SKILLS

- **Languages:** Python, Java, C++, Javascript ES6, Typescript, Golang, Rust, SQL **Technologies (Library):** Pytorch, Tensorflow, Sklearn, numpy, pandas, ReactJS, Redux, React Native, NestJS, Django, Django Rest Framework, Postgres, MongoDB, Firebase, Node, Flutter, Riverpod, Bloc
